

Module 2 R Markdown 1

Ryan Jervig

February 19, 2018

Level 1 header

R Markdown

Level 3 header

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

Here's a link to visit The Viper

Formatting in **bold** or *italics*.

When we compile, we'll use the R Markdown package.

To make a list, do this:

- Breakfast
 - food
 - * eggs
 - * bacon
 - * toast
 - drinks
 - * coffee
 - * OJ
 - * milk
- Lunch
 - taco

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##   Mean  :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.  :25.0    Max.    :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

```
plot(pressure)
```

Insert Tables

```
knitr::kable(head(cars))
```

speed	dist
4	2
4	10
7	4
7	22
8	16
9	10
